

Have dementia? Support someone living with dementia?

Join our group and be supported to help design local health and care services.

We are starting a group for people with dementia and experience of looking after family or friends with dementia to come together and use their experience to help design services that better meet their needs.

Who can join?

Anyone with 'lived experience' of dementia or supporting someone living with.

Who will we work with?

A partnership of NHS, Broxtowe Borough Council and a wide range of local groups, organisations and citizens with a focus on Dementia, coordinated by a local design team in the Nottingham West Primary Care Network (PCN).

What will we do?

- Identify issues people with dementia face daily and collaboratively design solutions for the local area with local citizens, services and partners.
- Be part of the decision-making process from the very beginning through to implementation and review.
- Provide valuable insights, design and review information that is needed at the right time.
- Share our voice and experiences of living, or caring for someone with dementia.

What commitment will it involve?

- Most lived experience groups meet once a month for a couple of hours.
- We understand that people have multiple commitments and sometimes have to miss meetings.
